## So do we!

Fort Worth Audubon Society members are avid bird watchers and nature lovers who enjoy observing wildlife in their natural environment and also love to....

- ....continue to learn and share their knowledge with others about the outside world;
- ....bring together those who are interested in birds, other wildlife and nature;
- ....work together to protect and nourish wildlife in their backyards and beyond;
- ....meet regularly to learn and invest time to improve the environment.

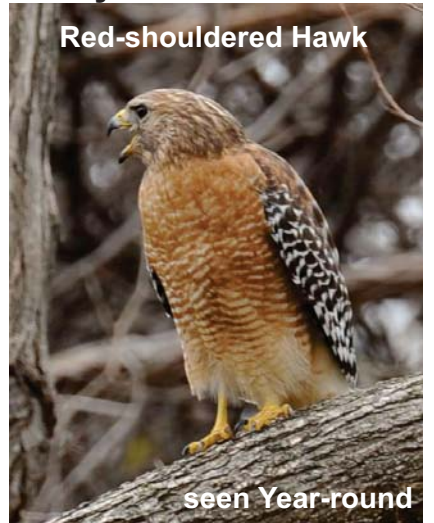

## If that sounds like you, come join us!

The Fort Worth Audubon Society holds general meetings on the second Thursday of each month from September thru May. The meetings are free and open to the public.

For more information about our meetings, our monthly field trips, and who we are, visit:

# Birds Seen In Tarrant County

Fort Worth Audubon members and ornithologists have recorded over 375 bird species in Tarrant County. We regularly see 52 summer species, 103 winter species, and 61 year-round species. Shown on this page are a few of the waterfowl and wading birds observed on county lakes, ponds, and the marshes along area streams and river.

# Birds Seen In Tarrant County

The birds shown here are just a few of the many Passeriformes (sparrow-like) species commonly seen in Tarrant County. Listen for their songs and warning chips. Watch for their quick movements around bushes and reeds, and overhead in the trees.

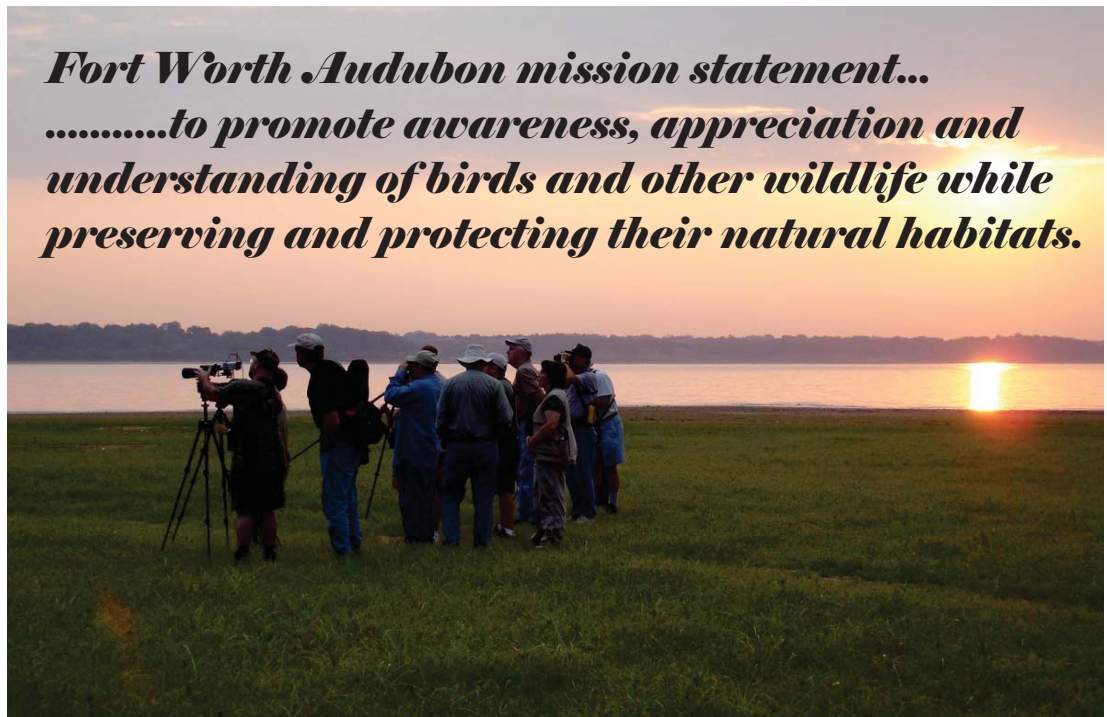

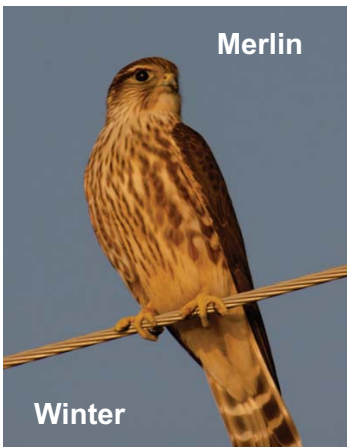

Passeriformes make up over half of the 10,000+ species of birds in the world. Most birds are easy to identify by their color patterns and their songs. We recommend to everyone interested in bird identification to begin with a bird field guide book.

# Birds Seen In Tarrant County

The raptors shown on this page are commonly seen on area lakes and nearby woodlands and fields. Bald Eagles and Osprey have nested near Lake Worth, Benbrook, Grapevine and Eagle Mountain lakes for several years.

If you would like to know more about when bird species are seen in Tarrant county, Fort Worth Audubon Society offers a *Field Checklist and 12-month Graph Table of Occurrence* in PDF file format on our homepage at [www.fwas.org](http://www.fwas.org).

**Thank You** to our members who kindly shared their photos!
